

## Gamania Group Announced Unaudited Consolidated Revenue in April 2026

Unit: NT\$ thousand

Monthly	Apr. 2026	Mar. 2026	MoM %
Revenue	658,997	645,349	2%
Monthly	Apr. 2026	Apr. 2025	YoY %
Revenue	658,997	781,922	-16%
Cumulative	Cumulative 2026	Cumulative 2025	Cumulative YoY %
Revenue	3,249,983	3,664,965	-11%

Gamania Group today announced its unaudited consolidated revenue of NT\$659 million for April 2026, representing a 2% increase MoM and a 16% decrease YoY. The decline was primarily attributed to the flagship PC online game entering a pre-peak-season preparation phase with fewer in-game events during the month. Meanwhile, a major update to the Group's popular mobile game drove a strong rebound in player activity, pushing monthly active users to a new multi-year high. The accumulated unaudited consolidated revenue for the January to April period reached NT\$3.25 billion, representing an 11% decrease YoY.

### Review of April Operations

- **Gaming Updates:** MapleStory partnered with a well-known anime IP to launch a collaboration event, introducing iconic combat mechanics to enrich battle gameplay and enhance the overall player experience.
- **Original IP Expansion:** The Group's original AI virtual idol, the temple girl "Miya Kien," participated in the Baishatun Mazu Pilgrimage, combining online livestreaming with offline accompaniment to interact with tens of thousands of pilgrims. This marked the first time a virtual character has been incorporated into a major physical cultural event in Taiwan.
- **Corporate Governance:** According to the 12th Corporate Governance Evaluation results announced by the Taiwan Stock Exchange, Gamania Group has consistently ranked in the top 6%–20% among OTC-listed companies for six consecutive years,

reflecting the Group's long-term commitment to corporate governance and sustainable transformation.

## May Outlook

- **Enterprise Services:** gamania CloudForce will participate in Taiwan's annual flagship cybersecurity exhibition, showcasing its enterprise operational transformation from passive monitoring to intelligent prevention with a focus on resilient digital defense systems. The Group will also participate in an enterprise data center forum, presenting high-performance computing environments and value-added data center services tailored to the needs of SMEs and AI startups, continuing to expand its enterprise services market.
